

Cut the time it takes to hand tag merchandise in half!

The V-Tool [™] system with its unique dual hook and tag holder eliminates the need to hand apply with fasteners, strings or pins.

V-Tool cuts the tedious task of hand tagging over 50%! Tag more products quicker, easier. The time saved can be used to perform other essential tasks in your store.

V-Tool doesn't require merchandise to be penetrated by a needle. Instead it uses a loop-fastened tag that is applied when the hook applicator wraps around a strap or belt loop, through a zipper pull or button hole.

The V-Tool holds 50 easy to load double-ended V-Fasteners. Slip in a clip, lock in place, squeeze the trigger and start saving time. The V-Tool will help eliminate wear and tear on your fingers too!

V-Tool and V-Fasteners are ideal for

- Belts
- Glasses
- Handbags
- Luggage
- Footwear
- Toys
- Sporting Goods
- Outdoor Furnishings
- Grills

The list is endless! If it "wears" a tag, you need a V-Tool

V-Tool fasteners are tamper-evident. They have an arrow and barrel configuration that forms a strong mechanical lock. The fasteners cannot be removed without destroying the loop or damaging the tags.
